Summary

Recent graduate of the University of Adelaide Coding Bootcamp, dedicated to growth and improvement as a full stack developer. Looking to transition from the field of building surveying and utilise skills I've gained, to flourish in a new, exciting field.

Technical Skills

Languages:

HTML – CSS - JavaScript – GraphQL

Frameworks/Libraries/Databases:

Tailwind – Bulma – Node – React – MySQL – Mongoose – APIs – Express - jQuery

Projects & Applications

Calorie Burner App: Developed using JavaScript and two APIs to gather caloric and nutritional information. This was a collaborative project, with my primary responsibility being front-end development.

Deployed link: <https://tronglongphung.github.io/calorie-burner/>

Weather Dashboard: Using HTML, JavaScript and Bootstrap for styling, the weather dashboard uses an API to determine the weather forecast in the selected city.

Deployed link: <https://linka-source.github.io/Weather-Dashboard/>

Education

University of Adelaide Coding Bootcamp – 2021

Relevant Coursework: Full-stack development bootcamp including; HTML, CSS, JavaScript, APIs (web, third-party, server-side), NodeJS, Object Oriented Programming, Express, MySQL, Object Rational Mapping, Model View Controller, MongoDB, Progressive Web Apps, React

Languages

- Polish: Native Proficiency
